Relief Dual[®] Off-loading Solution

Frequently Asked Questions

Do you have statistics of approximately how much pressure is reduced whilst wearing the product?

Statistics:

- Reduces pressure experienced in the 1st met by 42% (Men) 70% (Women) (pressure experienced in the toes)
- Reduced pressure experienced in the 'Mid Stance' phase by 67% (Men) 59% (Women)
- Reduced pressure experienced in the heel area by 34% (Men) 57% (Women)

Is an additional shoe needed to even out the patient's height whilst wearing the product?

No height balance solution needed – no additional cost to the clinician or patient.

Is the product bulky and does it limit movement?

Less bulky than a walker and doesn't restrict or limit movement. The reinforced shank fully supports the foot. It is discrete and aesthetically pleasing – unlike a walker.

Can patients still take part in day-to-day activities whilst wearing this product?

Patients can continue day-to-day activities, no disruption to life and no disruption to healing stages. Both the patient and the clinician are happy.

How long will the shoe last?

DARCO suggests this shoe will last 12 months.

Do you offer bulk discount pricing?

Bulk discount pricing is available for this product when 12+ are purchased.

What is the lead time if you have none in stock?

Lead time from supplier: 2 weeks.

Is this product available on Supply Chain?

This product is not currently on Supply Chain, it will be added in September 2016.

Is a sample of this product available for a trial?

Yes. Your account manager would be happy to provide a trial, please contact info@algeos.com.

Is there any evidence that proves this product works?

Yes. Please visit our website www.algeos.com/darco to request your information pack and research paper.
